

2010 Amendments to Scotts Summerhouses Brochure

Scotts of Thrapston has an ongoing programme of product development and is pleased to announce some refreshing new changes and enhancements to the existing Scotts summerhouse range.

SEATING AND UPHOLSTERY

Underseat Storage

If you choose seating for your summerhouse, it will now incorporate integral storage cupboards beneath the timber seating, whatever model you select. This storage option has proved very popular in the past and so Scotts is now offering it as standard, within the seating, across all summerhouse buildings, at no additional cost.

These storage cupboards are neatly hidden within the seating area and are the perfect hiding place for your garden accessories.

Upholstery

Scotts has always been ahead of the market in offering sumptuous furnishings for the summerhouse range and is pleased to introduce a completely fresh approach for 2010.

If you choose seating and upholstery for your summerhouse, the styles of cushions and the fabric designs have changed as detailed here. *Further details and photographs can be seen at: www.scottsofthrapston.co.uk/summerhouses*

- All backrest cushions are now tabbed and neatly fit over a wooden rail
- There is a choice of **5 PLAIN** materials and **4 PATTERNED** fabrics from our two ranges:

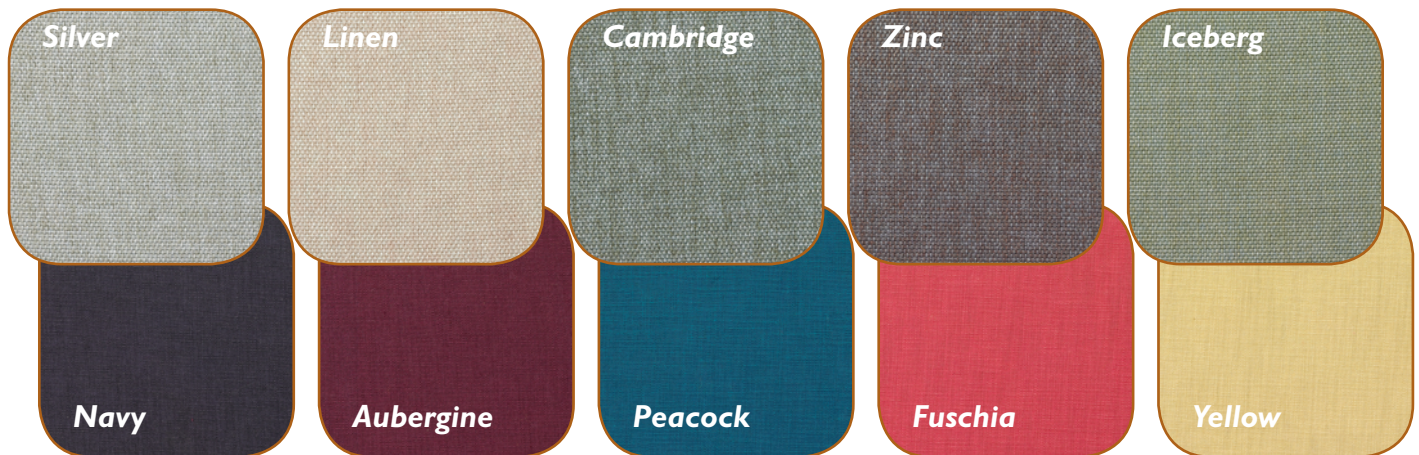

The Plain Collection

The deep seating cushions made with the plain fabric are one colour on the top and are complemented with a contrasting colour (as shown below) on the sides and underneath as well as for the piping.

The luxurious backrest cushions are made from block foam with contrasting piping, side panels, reverse and buttons.

The main plain colour choices are represented in the top swatches with the contrasting colour below.

(Please note that colours may vary due to the printing process, samples are available on request.)

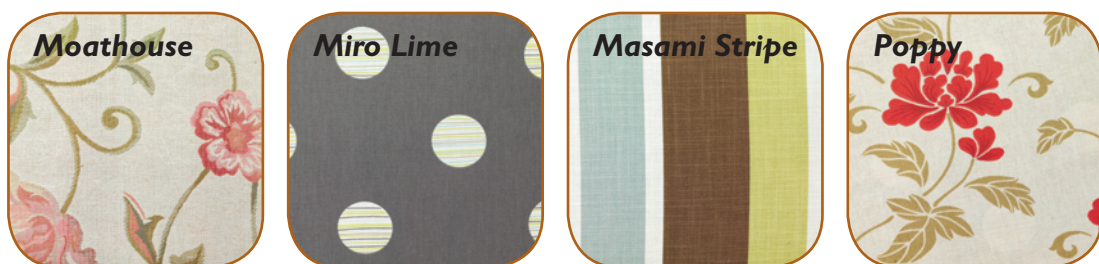

The Patterned Collection

Patterned seating cushions are of high quality with piping detail as standard.

The backrest cushions have a hollow fibre filling, for a more relaxing feel, and include button detail.

Fabric choices

The Miro Lime and Masami stripe designs have a contrasting beige piping and fabric on the sides and reverse. The Poppy design has contrasting red piping and fabric.

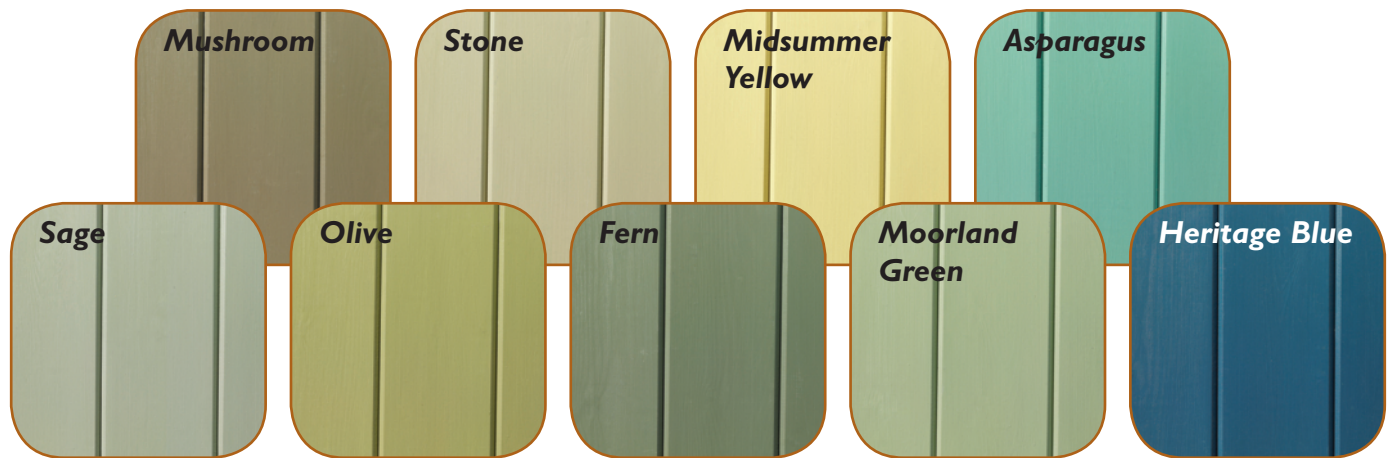

The Traditional and Contemporary cushion styles, as well as the fabric designs, as shown in the current brochure, are no longer available.

COLOUR FINISHES

In response to customer demand, the paint finish colours for the summerhouses have been updated. All summerhouses are available, as standard in the pressure treated finish but most customers select an appealing paint colour to blend in with their garden setting.

For 2010, there are 14 charming colour finishes, over and above the pressure treated option:

The following colours are the same as in the current brochure: OffWhite, Buttermilk, Peacock Blue, Heritage Green & Flagstone. The new colours for 2010 are:

(Colours may vary due to the printing process, samples are available on request)

The 2009 paint colours ~ Sandstone, Scotts Green, Mulberry, Light Green, Mediterranean Blue, Arctic Blue, Teal and the Moss Green Wood Stain ~ are no longer available.

OPTIONAL ACCESSORIES

There are some new and exciting optional accessories available for 2010 which are available, at an additional cost, for all models unless otherwise specified.

Tongue and groove effect lining

All summerhouses can be internally lined, to eaves height, with a T & G effect lining, in the colour of your choice. This lining adds the perfect finishing touch to any building and comes complete with skirting and architrave. If desired, insulation can also be supplied at an additional cost.

Leaded Glass

A Georgian effect, decorative leaded glass can be specified instead of the plain glazing option which is available as standard. This traditional style leaded glass can be chosen for the windows and doors to harmonise with period properties whilst still offering maximum daylight into the summerhouse.

Flooring

Scotts is launching a new, durable flooring option within its range of summerhouses, which offers a practical and tasteful floor covering. This unique new woven vinyl flooring gives you the natural feel and texture of sisal and seagrass, whilst pleasant and warm underfoot. And, as this floor covering is waterproof and easy to clean it offers a perfect solution for any summerhouse.

Lounger Insert

The unique Scotts lounger insert is now available for the Burghley Summerhouse, ensuring that the seating within this larger summerhouse can quickly and easily be converted into an instant bed. Comprising a slatted timber base with matching fabric cushions, this is a wonderful accessory for a relaxing afternoon nap in the garden.
